# Indonesia installs solar photovoltaic panels

#### **Overview**

The Indonesian government has published a draft of its Comprehensive Investment and Policy Plan (CIPP) to set out Indonesia's decarbonisation initiatives to 2050, which include reaching net zero and expanding the country's installed solar capacity to 264.6GW by the middle of the century. Where are solar power plants located in Indonesia?

Solar Power Plants in Indonesia: Notable Locations 1. Cirata Floating Solar Power Plant The Cirata Floating Solar Power Plant, located in West Java, is one of the largest solar projects in Indonesia and Southeast Asia. With an installed capacity of 145 MW, it began operations in 2021 (Jakarta Post, 2023).

What are Indonesia's floating solar PV potentials?

One of the realizations of Indonesia's floating solar PV potentials is the Cirata Reservoir in West Java, which has just been inaugurated at the end of 2023. Hosting Southeast Asia's largest floating PV installation, the Cirata Floating PV Installation covers 225 hectares of water, boasting a capacity of 192 MW.

Can Indonesia harness solar energy?

While solar energy capacity is increasing in Indonesia, the current installed capacity is just a fraction of the potential capacity of solar power development. As a nation that straddles the equator, it gets direct, high-intensity solar irradiance, putting it in an ideal position to harness solar energy.

What is the potential of rooftop solar PV in Indonesia?

Expansion of Solar Rooftops for Households Another major potential is presented by the utilization of rooftop solar PV for households in Indonesia. With a potential capacity of 32.5 GW, Indonesia's rooftop solar PV, as of June 2023, produces up to 95 MW, with the household sector accounting for 72% of the share.

Is solar PV growing in Indonesia?

Up to now, solar PV growth in Indonesia has been slow compared to various other countries in the region and, to overcome this, Indonesia's government has set targets to increase solar PV substantially by 2030. 4 The sector, though, will face challenges in producing solar products that can compete with those of other exporting nations.

How much solar power does Indonesia have?

Indonesia 's total installed solar capacity reached 717.71 MW in August, according to figures released by the Institute for Essential Services Reform (IESR). The Jakarta-based think tank recently published its "Indonesia Solar Energy Outlook 2025" report.

#### Indonesia installs solar photovoltaic panels

### Indonesia plans to install 264.6GW of solar ...
