

### **SolarInvert Energy Solutions**

### Ireland 30kw energy storage

#### **Overview**

What is Ireland's energy storage policy?

This is the first electricity storage policy published in Ireland. The Irish Government's Climate Action Plan 2021 set out the need for an energy storage policy for Ireland to support 75% reduction in power sector CO2 emissions by 2030.

Will Ireland need more energy storage?

With a target of 80% renewable electricity from intermittent sources on our grid by 2030, Ireland will require a significant amount of energy storage in the years to come.

Should 'long duration' electricity storage systems be integrated into Ireland's Electricity Grid?

In this regard, greater emphasis is placed on ensuring 'long duration' electricity storage systems – systems that have the capacity to deliver electricity throughout at least a four-hour period – are integrated into Ireland's electricity grid.

How will long-term storage technology impact Ireland's power system decarbonisation?

New and emerging long duration storage technologies will play a critical role in delivering an affordable, fully decarbonised power system to the people of Ireland. #1 We have a problem: The amount of wasted renewable energy in Ireland is projected to increase exponentially as we attempt to deliver on our power system decarbonisation targets.

What is Ireland's energy policy?

The policy sets out 10 policy actions, which include the following proposed key actions: Electricity storage system operators are to be given access to all wholesale electricity markets in Ireland.

What is energy storage Ireland?

Energy Storage Ireland is a newly established representative body composed of industry members who are active in the development of the energy storage market in Ireland.
