Is there a large demand for energy storage in Tuvalu

Overview

Will Tuvalu achieve 100% renewables by 2030?

The pacific island nation of Tuvalu is on track to achieving its goal of 100% renewables by 2030, with the recent commissioning of a 500 kW rooftop solar project and 2 MWh battery energy storage system in it's capital Funafuti. Image: United Nations Development Programme Pacific Office.

Does Tuvalu have biomass?

Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important source in lower-income settings. Tuvalu: How much of the country's electricity comes from nuclear power?

Nuclear power - alongside renewables - is a low-carbon source of electricity.

How much does electricity cost in the Pacific?

According to the ADB, the average cost for electricity across the Pacific is \$0.73 (USD 0.47) / kWh, and increases significantly for smallers isolated developing states, which negatively impacts economic growth and exposes them to diesel price spikes
