Jerusalem Solar Photovoltaic Power Generation System

Overview

Where is the largest photovoltaic power plant in Israel?

the largest photovoltaic power plant in Israel was built in December 2014 at Ramat Hovav, over a risky dumpsite.

Can Israel scale up solar?

An 8.5MWp solar farm from EDF in Israel. Image: EDF. Israel is planning to scale up solar deployment as part of a new government strategy designed to put the country on track to have 30% of its electricity generation from renewables by 2030.

Is solar energy cost-competitive in Israel?

In Israel, solar technology has progressed so much that it is nearly cost-competitive with fossil fuels. The Negev Desert's high yearly solar incidence has fostered an internationally recognized solar research and development industry.

How much solar power will Israel have in 2021?

Having deployed 3,591MW of solar as of the end of 2021, that figure will jump to 9,800MW by 2025 and 17,145MW by the end of the decade under the new roadmap, published by Israel's electricity authority and energy ministry yesterday.

Where is the first solar field in Israel?

The first commercial solar field of Israel is located in Ketura Sun. Arava Power Company built it on Kibbutz Ketura in early 2011. Ketura Sun is a 20-acre (8.09-hectare) solar farm that will generate 4.95 megawatts of green energy.

What is the goal of the Ashalim solar station?

Its goal is to generate 10 percent of Israel's energy by 2020 from clean

resources. The Ashalim solar station is located in Israel's Negev desert, close to the Ashalim kibbutz. It is divided into 3 plots, each with different technology. The station uses three different types of energy: photovoltaic, solar thermal, and natural gas.
