Kathmandu Energy Storage Project Planning Scheme

Overview

Can a geospatial model predict energy storage capacity across the Nepal Himalayas?

In this study, we configured a geospatial model to identify the potential of PSH across the Nepal Himalayas under multiple configurations by pairing lakes, hydropower projects, rivers, and available flat terrain, and consequently estimate the energy storage capacity.

How many storage projects are there in Nepal?

Nepal has only two storage projects—Kulekhani I (60 MW) and Kulekhani II (32 MW). The project, which will be Nepal's third storage type, is 150 km west of Kathmandu on the Seti river near Damauli in the Tanahun district. Shyamji Bhandari, project chief, said grouting is being done in the lower level area of the main dam under package 1.

When will Nepal's largest energy storage project be completed?

The project said the overall construction is set to be completed by May 2026. The project will be one of Nepal's biggest storage-type projects, with an estimated annual energy generation capacity of 587.7 GWh for the first 10 years and 489.9 GWh from the 11th year. During the dry season, the project can generate energy for six hours daily.

Why do we need pumped storage schemes in Nepal?

It is imperative to think of implementation of Pumped Storage Schemes in Nepal to stabilize the National Electricity Grid. The justification for such a need being: Variation in demand both on a daily and annual basis. Variation in supply both on a daily and annual basis due to hydrology. (as most schemes are run of river in the country.).

How are pumped storage hydropower schemes distributed in Nepal?

Strip distribution of technically viable pumped storage hydropower (PSH)

schemes at different elevation bands (EB1: 0---500 m, EB2: 500---1000 m, EB3: 1000---2000 m, EB4: 2000---3000 m, and EB5: 3000---5000 m above sea level) across Nepal.

Can solar PV be integrated with pumped hydro storage in Nepal?

Integrating Solar PV with Pumped hydro storage in Nepal: A case study of Sisneri-Kulekhani pump storage project Hydropower Development in Nepal - Climate Change, Impacts and Implications Mool PK, Wangda D, Bajracharya SR, Kunzang K, Raj Gurung D, Joshi SP.
