

SolarInvert Energy Solutions

Latest electricity prices for South Asia energy storage projects

Overview

What is the cheapest power source in Asia?

Utility PV emerged as the cheapest power source in 11 out of 15 countries in the Asia Pacific," said Sooraj Narayan, Senior Research Analyst, APAC Power & Renewables at Wood Mackenzie. The new-build solar project costs will drop another 20% by 2030, driven by falling module prices and increasing oversupply from China.

How much does battery storage cost in 2024?

BNEF's Levelized Cost of Electricity report indicates that the global benchmark cost for battery storage projects fell by a third in 2024 to \$104 per megawatthour (MWh), as a glut in supply due to slower electric vehicle sales led to cheaper prices for battery packs.

How much does a megawatt-hour of electricity cost?

On average, the country can produce a megawatt-hour of electricity from major power-generating technologies 11-64% cheaper than other markets. For example, power generated from onshore wind turbines costs around 24% less than the global benchmark of \$38 per megawatt-hour.

Is China lowering the cost of renewables?

Source: Wood Mackenzie Asia Pacific Power & Renewable Services China is leading the way in lowering the cost of renewables, with utility PV, onshore wind, and offshore wind being 40-70% cheaper compared to other Asia Pacific markets.

What is the levelised cost of electricity (LCOE)?

The cost of electricity generated from renewable sources, known as the levelised cost of electricity (LCOE), is declining significantly in the Asia Pacific (APAC) region and reached an all-time low in 2023, according to Wood Mackenzie's latest analysis of LCOE for the Asia Pacific region.

Is distributed solar a viable alternative to residential solar?

Distributed solar has experienced an even greater decline in costs –a 26% decrease in 2023, and the technology is now 12% cheaper on average than residential power prices creating large potential for more rooftop solar applications.
