Lithium battery energy storage price trend

Overview

What factors affect lithium price?

Here are the main factors that affect lithium price: Market Conditions and Demand: The surge in demand from electric vehicles, portable electronic devices, and energy storage options significantly influences lithium demand. Quality and Grade of Lithium: Battery grade (higher purity) commands premium prices over industrial grades.

Why did lithium-ion battery prices drop 20% from 2023?

Lithium-ion battery pack prices dropped 20% from 2023 to a record low of \$115 per kilowatt-hour, according to analysis by research provider BloombergNEF (BNEF). Factors driving the decline include cell manufacturing overcapacity, economies of scale, low metal and component prices, adoption of lower-cost lithium-.

How does the OECD determine the price of lithium?

The OECD provides a comprehensive framework for determining the price of lithium. Here are the main factors that affect lithium price: Market Conditions and Demand: The surge in demand from electric vehicles, portable electronic devices, and energy storage options significantly influences lithium demand.

How much does a battery storage system cost?

Around the beginning of this year, BloombergNEF (BNEF) released its annual Battery Storage System Cost Survey, which found that global average turnkey energy storage system prices had fallen 40% from 2023 numbers to US\$165/kWh in 2024.

Why is lithium a commodity in China?

China produces an estimated 80% of the entire world's lithium-ion batteries each year, and about 60% of all electric vehicle batteries. As a result, Chinese prices for battery-grade lithium (i.e. lithium carbonate with over 99.5% purity)

have become one of the foremost proxies for the price performance of lithium as a commodity.

What is the demand for lithium-ion batteries in 2024?

That is more than 2.5 times annual demand for lithium-ion batteries in 2024, according to BNEF. While demand across all sectors saw year-on-year growth, the EV market – the biggest demand driver for batteries – grew more slowly than in recent years.
