# Lithium-ion battery energy storage cost per kilowatt-hour

#### **Overview**

How much does a lithium ion battery cost per kWh?

1 All prices do not include sales tax. The account requires an annual contract and will renew after one year to the regular list price. The cost of lithium-ion batteries per kWh decreased by 20 percent between 2023 and 2024. Lithiumion battery price was about 115 U.S. dollars per kWh in 202.

What are battery cost projections for 4 hour lithium-ion systems?

Battery cost projections for 4-hour lithium-ion systems, with values normalized relative to 2022. The high, mid, and low cost projections developed in this work are shown as bolded lines. Figure ES-2.

Are lithium-ion batteries more efficient than kilowatt-hour batteries?

dollars per kilowatt-hour a year earlier. Lithium-ion batteries are one of the most efficient energy storage devices worldwide. Over recent years, high-scale production and capital investment into the battery production process made lithium-ion battery packs cheaper and more efficient.

Which lithium ion battery chemistries have different costs?

Different lithium-ion battery chemistries can have varying costs. For example, lithium nickel cobalt aluminum oxide (NCA) batteries are commonly used in electric vehicles and often come with higher production costs compared to lithium iron phosphate (LiFePO4) batteries used in energy storage.

How much does energy storage cost?

Energy storage system costs for four-hour duration systems exceed \$300/kWh for the first time since 2017. Rising raw material prices, particularly for lithium and nickel, contribute to increased energy storage costs. Fixed operation and maintenance costs for battery systems are estimated at 2.5% of capital costs.

Why are lithium-ion batteries so expensive?

As of recent estimates, average prices for lithium-ion batteries have decreased significantly, reflecting advancements in technology and increased production capabilities. The cost of raw materials plays a significant role in determining the price of lithium-ion batteries. Lithium, cobalt, nickel, and graphite are primary components.
