

## **SolarInvert Energy Solutions**

# Luxembourg monocrystalline photovoltaic module glass

#### **Overview**

What is 144-cell monocrystalline n-type HJT solar module?

144-cell monocrystalline N-Type HJT solar module with bifacial half-cell architecture and glass-glass construction. This monocrystalline solar module, in half-cell architecture and glass-glass construction with white mesh backing, impresses with its very high wattage.

What is a glass/glass Polly/monocrystalline module?

Glass/Glass polly/monocrystalline modules with unique Glass/Glass design and thermo-sealing protection at all perimeter of the module ensuring superior robust protection against UV, humidity, ammonia and salt corrosion. Safety laminating is ensured by PVB foil.

Are glass-glass PV modules a good choice?

Glass-glass PV modules (b) do not require an aluminum frame and therefore have a lower carbon footprint than PV modules with backsheet (a). Although photovoltaic modules convert sunlight into electricity without producing emissions, PV-generated solar energy does produce CO2 emissions during production, transport and at the end of module life.

Does Luxembourg need photovoltaics?

Luxembourg has an ambitious target to increase the share of energy from renewable sources to 25% by 2030. The development of photovoltaics is one of the solutions recommended in Luxembourg's integrated national energy and climate plan (PNEC, Predicted No-Effect Concentration).

What is the difference between a glass/glass module and a standard module?

Compared with standard modules, the same glass material resistance and heat dispersal is more durable in fluctuating temperatures and hot climate zones, ensuring a 50 year lifespan. Unlike other Glass/Glass modules on the market, ViaSolis uses innovative edge-sealant technology to protect PV cells

from humidity.

What is a 132-cell monocrystalline n-type HJT solar module?

132-cell monocrystalline N-Type HJT solar module with bifacial 210 mm x 105 mm cells and glass-glass construction. This monocrystalline solar module, with 210 mm x 105 mm HJT cells and glass-glass construction with white mesh backing, impresses with its very high wattage.

### Luxembourg monocrystalline photovoltaic module glass

### ECO LINE HJT GLASS-GLASS BIFACIAL

Transparent, 108-cell monocrystalline N-Type HJT solar module with bifacial halfcell architecture and glass-glass construction. The transparent 108-cell high ...
