

### **SolarInvert Energy Solutions**

### Netherlands Energy Storage Power Source Factory

#### **Overview**

How many energy storage facilities are there in the Netherlands?

The vast majority of the 20 MW of installed energy storage capacity in the Netherlands is spread over just three facilities: the Netherlands Advancion Energy Storage Array (10 MW Li-ion), the Amsterdam ArenA (4 MW Li-ion), and the Bonaire Wind-Diesel Hybrid project (3 MW Ni-Cad battery).

What is the Netherlands Advancion energy storage array?

The Netherlands Advancion Energy Storage Array was commissioned in late 2015 and provides 10 MWh of storage to Dutch transmission system operator TenneT. The project, which represents 50% of all Dutch energy storage capacity, provides frequency regulation by using power stored in its batteries to respond to grid imbalances.

Where is RWE building its first battery energy storage system?

Image: RWE. Multinational utility and independent power producer (IPP) RWE has started building its first battery energy storage system (BESS) project in the Netherlands. The Germany-headquartered company announced the start of construction on the BESS at its Eemshaven biomass and gas power plant complex, near Groningen, last week (8 February).

How big is RWE's battery energy storage system?

The company currently operates battery storage systems with a total capacity of around 1,200 megawatts (MW). RWE's first inertia-ready battery energy storage system (BESS) has started commercial operation on the site of the company's power plant in Moerdijk, the Netherlands.

Where is RWE's first inertia-Ready battery energy storage system located?

RWE's first inertia-ready battery energy storage system (BESS) has started commercial operation on the site of the company's power plant in Moerdijk, the Netherlands. It is the first of its kind in operation in the Central European

grid. The BESS has an installed capacity of 7.5-megawatts (MW) and a storage capacity of 11 megawatt hours (MWh).

Does the Netherlands need 9GW of new energy storage by 2030?

Dutch transmission system operator (TSO) TenneT, which is also a TSO in Germany, has said the Netherlands needs 9GW of new energy storage by 2030 to integrate its renewable energy pipeline, but the market is beset by numerous challenges.
