New Energy Base Station Power Generation

Overview

How will China's new power base work?

All projects at the base are scheduled to be put into operation within China's 14th Five-Year Plan (2021-25) period. Once operational, the base is expected to export 24 billion kWh of power annually to East China's Shandong Province through the ultra-high-voltage power transmission line.

Will China build a second round of power stations?

(Photo:Xinhua) China will begin to build a second round of large wind and photovoltaic (PV) power stations in sandy, rocky and arid parts of the country, requiring provinces to report a list for the second round of large new energy bases by December 15, according to a notice released by the National Energy Administration (NEA).

How many kW of solar power will be installed at the base?

The clean energy projects at the base are planned to have an installed capacity of 6 million kW, which includes 4.5 million kW of wind power and 1.5 million kW of solar power. Construction of the supporting energy storage facilities is also included.

What is the largest grid-forming energy storage station in China?

This marks the completion and operation of the largest grid-forming energy storage station in China. The photo shows the energy storage station supporting the Ningdong Composite Photovoltaic Base Project. This energy storage station is one of the first batch of projects supporting the 100 GW large-scale wind and photovoltaic bases nationwide.

What is Ningxia power's energy storage station?

On March 31, the second phase of the 100 MW/200 MWh energy storage station, a supporting project of the Ningxia Power's East NingxiaComposite Photovoltaic Base Project under CHN Energy, was successfully connected to

the grid. This marks the completion and operation of the largest grid-forming energy storage station in China.

Where is the second phase of China's nuclear power plant being built?

The second phase kicked off construction on Tuesday in Northwest China's Ningxia Hui autonomous region, said its operator China Energy Investment Corp, or China Energy.
