# New battery project for energy storage in the Netherlands

#### **Overview**

A 100 MW / 200 MWh battery energy storage system in Waddinxveen, capable to power 50% of the city of The Hague, is set to go live mid 2026 and has a critical role in stabilizing the Dutch grid and accelerating the transition to renewable energy. Where is the Netherlands' largest stand-alone battery energy storage system located?

Dispatch, a Dutch battery developer, is going to construct the Netherlands' largest stand-alone Battery Energy Storage System (BESS) in the port area of Dordrecht. The system will be used for grid stabilization by storing excess energy from renewable sources. The battery, consisting of 144 Fluence cubes will be located on a 6000m<sup>2</sup> site.

Will dispatch build the Netherlands' largest stand-alone battery energy storage system?

This project marks the first of many aimed at developing up to 3GWh of BESS projects across the Netherlands, Belgium, and Germany over the next seven years. Dispatch, a leading Dutch battery developer, is going to construct the Netherlands' largest stand-alone Battery Energy Storage System (BESS).

How will Vattenfall manage a battery energy storage system?

Vattenfall will manage and optimize half of the system's capacity under an eight-year contract. Return has launched construction works on the 100 MW / 200 MWh Antares battery energy storage system (BESS) in Waddinxveen, in the western Netherlands. The project is set to go live mid 2026 and play a critical role in stabilizing the Dutch grid.

When will Lion storage's first battery energy storage system be operational?

Developer Lion Storage has received a construction permit for its first battery energy storage system (BESS) project, Mufasa, it announced on LinkedIn yesterday (24 June). The project in the port area of Vlissingen, northern Netherlands, is expected to be operational in 2026, Lion has said in the past.

Why does the Netherlands need energy storage?

"As the Dutch energy transition efforts accelerate, the demand for flexibility is growing also. The challenges to our electricity grid have never been greater. Without adequate energy storage, the Netherlands risks increasing grid instability and security of supply risks," Lion Storage said in its announcement.

Will a 100 mw/200 MWh battery energy storage system connect to Tennet?

Dutch energy storage firm Return has started construction on the 100 MW/200 MWh battery energy storage system in Waddinxveen, which will be the first project of the size to connect to the TenneT Netherlands high-voltage network in 2026. Vattenfall will manage and optimize half of the system's capacity under an eight-year contract.
