New energy liquid-cooled energy storage battery cabinet size

Overview

Ranging from 208kWh to 418kWh, each BESS cabinet features liquid cooling for precise temperature control, integrated fire protection, modular BMS architecture, and long-lifespan lithium iron phosphate (LFP) cells. How many battery cells are in a battery rack?

All wire connections are placed on the front side of the rack to allow easy installation and maintenance. Since each battery rack hosts 8 battery modules and each battery module has 52 battery cells, each battery Rack has a total of 416 battery cells connected in series.

What is a battery rack?

Each battery rack contains a rack-level BMS. The positive (+) and negative (-) terminals of the battery modules are clearly marked and are designed for the convenience of connection, visual check, examine, and repair. The external casing is made of metal covered by insulating materials.

What is a battery module made of?

The external casing is made of metal covered by insulating materials. For example, the top cover is made of PP, the bottom base is made of aluminum. The copper bars and screws are connected internally to prevent short circuit to ensure the electrical safety of the battery module. Each battery module has 8 temperature detectors.

New energy liquid-cooled energy storage battery cabinet size

Liquid-cooled Energy Storage Cabinet

o Cells with up to 12,000 cycles. o Lifespan of over 5 years; payback within 3 years. o Intelligent Liquid Cooling, maintaining a temperature difference of less than 2? within the pack, ...
