

## SolarInvert Energy Solutions

# New energy storage commercialization

## Overview

---

Based on a brief analysis of the global and Chinese energy storage markets in terms of size and future development, the publication delves into the relevant business models and cases of new energy storage technologies (including electrochemical) for generators, grids and consumers. Can energy storage be commercialized?

Energy storage has entered the preliminary commercialization stage from the demonstration project stage in China. Therefore, to realize the large-scale commercialization of energy storage, it is necessary to analyze the business model of energy storage.

How to realize the large-scale commercialization of energy storage?

Therefore, to realize the large-scale commercialization of energy storage, it is necessary to analyze the business model of energy storage. Providing readers with an overview of energy storage will contribute to the future development of energy storage business models.

Can energy storage be commercialized in China?

The application of energy storage ultimately depends on market demand. The commercialization of energy storage in China should find its own profit point and clarify the application scenarios and business models of various energy storage, so as to achieve long-term development of the energy storage industry.

When will new energy storage development be introduced?

The commission said earlier it will introduce a plan for new energy storage development for 2021-25 and beyond, while local energy authorities should also make plans for the scale and project layout of new energy storage systems in their regions.

Will China achieve full market-oriented development of new energy storage by 2030?

The country has vowed to realize the full market-oriented development of new energy storage by 2030, as part of efforts to boost renewable power consumption while ensuring stable operation of the electric grid system, a statement released by the National Development and Reform Commission and the National Energy Administration said.

How to develop energy storage business model in China?

In order to guide the development of energy storage business model, it is recommended to improve policy formulation in terms of planning, technical standards, market and regulatory mechanisms. In the planning stage of the power system, the Chinese government should consider the safety, economic and social benefits of energy storage.
