

### **SolarInvert Energy Solutions**

# Nordic wind solar and storage integrated project

### **Overview**

What is the largest battery energy storage project in the Nordics?

SEB Nordic Energy's portfolio company, Locus Energy, in collaboration with Ingrid Capacity, will build the largest battery energy storage project in the Nordics. The project will add 70 MW/140 MWh of storage capacity to SEB Nordic Energy's Finnish portfolio, which already includes wind and hydropower.

What does Seb Nordic energy do?

SEB Nordic Energy invests in major battery storage project Computergenerated picture of the future battery storage park in Finland. SEB Nordic Energy's portfolio company, Locus Energy, in collaboration with Ingrid Capacity, will build the largest battery energy storage project in the Nordics.

How much storage capacity does Seb Nordic energy have?

The project will add 70 MW/140 MWh of storage capacity to SEB Nordic Energy's Finnish portfolio, which already includes wind and hydropower. Located in Nivala Municipality in Finland's Ostrobothnia region, the project is expected to be completed in 2026.

What trends should a solar developer know about the Nordic power system?

The Nordic power system is undergoing significant structural changes, and as a solar developer, below are the key trends you should be aware of: Grid capacity: As in most grids in Europe, grid capacity is always a challenge. As competition for developing renewable energy is sharpening, securing capacity early is key.

What is integrated wind & solar & energy storage (iwses)?

An integrated wind, solar, and energy storage (IWSES) plant has a far better generation profile than standalone wind or solar plants. It results in better use of the transmission evacuation system, which, in turn, provides a lower overall

plant cost compared to standalone wind and solar plants of the same generating capacity.

Does Seb Nordic energy have a pan-Nordic IPP?

"SEB Nordic Energy continues to make significant investments in Sweden, Norway, and Finland, developing a pan-Nordic IPP\* for renewable energy.

### Nordic wind solar and storage integrated project
