Norway energy storage battery residual value

Overview

What is Norway's battery strategy?

Norway's first battery strategy was launched on 29 June 2022. The strategy presents 10 measures for how Norway will further develop a coherent and profitable battery value chain. Norway's battery strategy_ (spreads.pdf) Knowledge base: Basis for Norway's battery strategy Norway's first battery strategy was launched on 29 June 2022.

What is battery Norway?

Battery Norway (Norwegian Battery Platform) is a national industrial collaboration platform focused on innovation and sustainable value creation opportunities, encompassing the entire battery supply chain. It will closely follow the EU's battery strategy and act as an advisor to the authorities. Battery Norway aims to help to:

How big is Norway's battery market?

batteries for stationary energy storage - a market expected to reach EUR 57 billion by 2030. Now, a more mature Norwegian battery industry has greater potential to accelerate the renewable energy transition in Europe. Today Norway has not one, but two huge battery markets.

Are EV batteries the future of energy storage?

"There are two market drivers for batteries: EVs and stationary energy storage. Energy storage is coming on strong now. It's the key to turning intermittent wind and solar into a stable energy source," explains Pål Runde, Head of Battery Norway. An early adopter of electric transport, Norway continues to capture EV battery headlines.

Does Norway have a battery market?

Today Norway has not one, but two huge battery markets. "There are two market drivers for batteries: EVs and stationary energy storage. Energy

storage is coming on strong now. It's the key to turning intermittent wind and solar into a stable energy source," explains Pål Runde, Head of Battery Norway.

Is Norway a good place to buy EV batteries?

An early adopter of electric transport, Norway continues to capture EV battery headlines. Electric cars now account for 79 per cent of new cars sold in Norway, and the MS Medstraum was recently launched as the world's first electric fast ferry. In a global report on lithium-ion batteries, Norway ranked first in sustainability.
