

#### **SolarInvert Energy Solutions**

# **Oman 2025 Photovoltaic Battery Energy Storage**

#### **Overview**

MUSCAT: A new solar PV based Independent Power Project (IPP), set to come up at Ibri in Al Dhahirah Governorate, is expected to be integrated with utility-scale battery storage in a first for Oman's rapidly expanding renewable energy sector. Will Oman have a solar energy storage system?

Additionally, PDO is finalizing plans for a 100 MW solar PV-based IPP, named the 'North Solar Storage IPP,' set to include Oman's first battery energy storage system (BESS). This BESS, using lithium-ion battery technology, will store electrical energy and supply a maximum of 100 MW peak power to PDO's grid during daylight hours.

How much will Oman's power sector invest in the next six years?

Taken together with parallel plans for the implementation of a raft of Wind IPPs and combined cycle gas turbine (CCGT) power projects, total investment in Oman's power sector is set to balloon to well over \$5 billion over the next six years through to 2030.

Will SINAW host a 300 MW solar PV project in Q2 2028?

Sinaw in Al Sharqiyah North Governorate is tipped to host a 250 – 300 MW solar PV project worth around \$200 – 250 million in investment and slated to be operational in Q2 2028.

Why do solar power plants need battery storage?

Battery storage allows solar power plants to store excess energy generated during the day for use at night or when demand is higher. Storage is key to balancing electricity supply and demand, while also supporting the grid.

Will a 500 MW Ibri III solar IPP include a battery storage option?

According to a senior official of Nama Power and Water Procurement Company (PWP), the single procurer of power and water capacity in the Sultanate of Oman, the upcoming 500 MW Ibri III Solar IPP — currently in the early stages

of procurement — will include a sizable battery storage option.

Will Nama develop a swathe of new solar IPPs?

At the same forum on Thursday, Nama's Eng Al Abri announced plans for the development of a swathe of new Solar IPPs with a capacity aggregating around 4,500 megawatts (MW) and entailing an estimated investment of \$2.8 billion.
