

## **SolarInvert Energy Solutions**

## **Outdoor Energy Storage in India**

2MW / 5MWh Customizable

#### **Overview**

What if India doesn't have a good energy storage system?

India aims to install 500 GW of non-fossil capacity by 2030, with renewables expected to supply roughly 50% of total generation. Such variable resources demand flexible buffers. Without the right types of energy storage systems, curtailment rises and project economics suffer.

Which companies are deploying energy storage systems in India?

Renew Power, one of India's largest renewable energy companies, has recently forayed into energy storage solutions. The company is deploying utility-scale battery storage systems to enhance grid stability and integrate renewable energy into the grid more effectively. 7. Okaya Power Group.

What is India's energy storage policy?

India's policy landscape for energy storage is evolving rapidly. The government has introduced hybrid renewable and storage policies, along with increased budget allocations for solar projects, including \$1.1 billion for grid-connected solar and funds for rooftop solar.

Can solar-plus-storage transform India's energy landscape?

As a long-term renewable energy partner in India, we recognize the immense potential of solar-plus-storage in transforming the country's energy landscape. We are actively exploring co-located solar and storage as well as standalone BESS projects to support energy security, grid reliability, and sustainable economic growth.

What are the challenges faced by India's energy storage system?

lock reliability. Current storage costs pose challenges. Grid infrastructure expansion must align with renewable capacity additions to prevent congestion. The Government of India set up a 'Round-the-Clock' tender to combine rene able energy with storage, yet implementation is pending.

Introducing storage systems at various I.

How is India advancing energy storage solutions?

At the heart of this momentum is the strategic push by the Government of India and various state authorities, backed by institutions like SECI, NTPC, and SJVN, to advance energy storage solutions. A landmark initiative includes the approval of Viability Gap Funding for 13,200 MWh of battery energy storage systems by 2030-31.
