# Outdoor photovoltaic AC combiner box

### **Overview**

What is a PV AC combiner box?

The new PV AC Combiner boxes have been designed for PV systems with string inverters in trackers or fix tilt systems. The product portfolio is suitable for inverters from 60 kW up to 200 kW and support voltages of 400 V, 690 V or 800 V AC. The combiner boxes allow to collect from 2 up to 6 string inverters in one single cabinet.

What is LX-AC photovoltaic AC combiner box?

LX-AC photovoltaic AC combiner box is an important component suitable for series photovoltaic power generation systems, which is used to connect series inverters with AC distribution cabinets or step-up transformers. The incoming line of this combiner box uses a circuit breaker input, and the output uses a circuit breaker or load isolation switch.

Which AC combiner is best for a PV system?

There are several models to choose from, which are widely suitable for various AC combinations of PV systems. The AC combiner is a highly reliable device and should be used with a series PV inverter with an AC output voltage of 800V. There are several models to choose from, which are widely suitable for various AC combinations of PV systems.

What is shlx-ac4/1 AC PV combiner box?

Current rating of the photovoltaic fuse, circuit breaker i s modified. SHLX-AC4/1 AC PV combiner box is applicable to the PV group on power system. It is an important part to undertake series inverter and AC powe distribution cabinet or a step-up transformer and access up to four sets of photovoltaic group on inverter.

Does ABB offer prewired solar combiner boxes?

ABB also offers prewired solar combiner boxes with not only string protection,

surge protection and disconnection but also with additional monitoring devices. The monitoring device CMS PV collects all main information such as string current, voltage and temperature in one device.

How many inverters are in a 400v/50kw AC combiner box?

Taking the AC combiner box with 4 in 1 (400V/50KW) as an example, there are a total of 4 inverters of 50KW: Label 1: The output end of the inverter is directly connected to the 4P circuit breaker. The circuit breaker can quickly cut off the fault current. The maximum AC output current of the inverter is 80A.
