PV Inverter Insurance Renewal

Overview

What is PV warranty insurance?

The video is not available. Check out in 140 seconds how you will benefit from our PV Warranty Insurance for up to 30 years. Our PV Warranty Insurance is straightforward and effective: manufacturers protect their ability to pay excessive warranty claims on modules for a period of 25 years (up to 30 years for glass-glass modules).

When should a PV system be insured?

Normally, a PV system is insured immediately after construction, or when purchased. The insurance is then based on the value of the equipment in new condition. With each year of operation, the real value of a PV system decreases. Photovoltaic insurance from an expert.

Does a solar inverter have a warranty?

Most solar inverter manufacturers leave workmanship (labor) warranties to the installer. Still, like labor and shipping costs, some manufacturers offer an extra safeguard by tacking on their own workmanship warranty coverage. When applicable, it's typically only an option if you work with specific installers in a manufacturer's certified network.

Do you need photovoltaic insurance?

The photovoltaic insurance protects against expensive damage. A PV system is a valuable investment that should be insured like a car or house. Although solar systems require little maintenance, components can break down and a weather event such as heavy hail damages even the best system.

How long does a solar inverter last?

While the warranty terms for inverters themselves vary, warranties for communications equipment (which allow the inverter to connect to other devices like solar panels and battery systems) are typically capped at 5 years

for both string inverters and microinverters.

What is solar panel warranty insurance - section 1?

uyers. The Solar Panel Warranty Insurance -SECTION 1 insures the PV modules of specific Sales Contracts, which can be chosen by the manufacturer.
