

SolarInvert Energy Solutions

Passive solar systems in Croatia

Overview

Does Croatia have a solar market?

The Renewable Energy Sources of Croatia Association (RES Croatia) says Croatia's solar market is growing year over year. But with residential and industrial rooftops accounting for most new installations, a key focus is enabling utility-scale growth. Croatia installed 397.1 MW of solar in 2024, according to figures from RES Croatia.

How many solar power plants are there in Croatia?

There are currently over 26,000 solar power plants connected to the grid in Croatia with a combined capacity of 872.1 MW, according to RES Croatia's figures, meaning the country is on course to join the gigawatt club this year.

How much solar did Croatia install in 2024?

But with residential and industrial rooftops accounting for most new installations, a key focus is enabling utility-scale growth. Croatia installed 397.1 MW of solar in 2024, according to figures from RES Croatia. The figure is an increase on the 238.7 MW of solar that were installed in 2023.

What are Croatia's sensitivity maps?

Croatia's sensitivity maps provide a data-driven foundation for developing renewable energy in harmony with nature. The biodiversity sensitivity maps are key to nature-positive energy planning. As part of the European Green Deal, Croatia aims to achieve a 42.5% share of renewables in gross final energy consumption by 2030.
