Peak inverter high power

Overview

What is a peak3 inverter?

PEAK3 stands for pure power. With its compact design, the inverter offers the highest power density per device. The advantages: optimal performance at a light weight. The result is cheaper transportation and easier installation. In combination with the project-specific DC Combiner Boxes, the PV array can be oversized up to 200 %.

What is inverter peak power?

Some appliances start with several times the power required for normal operation, but only for a short period of time. The purpose of inverter peak power is to ensure that the power inverter can handle the peaks of such appliances and protect the power inverter, thereby preventing the peaks from damaging the power inverter.

Which SMA inverter is best for a ground mount project?

Opportunities abound for integrators to improve their bottom line with the Sunny Highpower PEAK3 125 kW from SMA—the only 1,500 VDC inverter with the ability to connect to the grid at 480 VAC. For large ground mount projects, SMA's PEAK3 delivers the most cost-effective solution and highest energy production.

Which inverter is best for repowering large-scale PV plants?

Repowering Ready: The PEAK3 FLEX offers best in class flexibility in a modular architecture that achieves a universal solution for repowering large-scale PV plants. SMA offers the ONLY 1,500 VDC inverter with the capability of interconnecting at 480 VAC without adding significant additional equipment and incurring lost energy production.

Which string inverter is best for industrial PV plants?

String inverter Sunny Highpower PEAK3 SHP 180-21 from SMA is a

powerhouse specially developed for industrial PV plants. This inverter is the solution for large-scale solar panel systems thanks to its high power density. Due to its compact size, it is easy to transport and the installation process takes little time.

Which inverter is best for industrial solar panels?

This inverter is the solution for large-scale solar panel systems thanks to its high power density. Due to its compact size, it is easy to transport and the installation process takes little time. The SHP 180-21 is a cost-saving solution for industrial solar panel installations.
