Photovoltaic glass second quarter report

Overview

How big is the Solar Photovoltaic Glass market?

The Market Size and Forecasts for the Solar Photovoltaic Market are Provided in Terms of Volume (tons) for all the Above Segments. The Solar Photovoltaic Glass Market size is estimated at 27.11 Million tons in 2024, and is expected to reach 63.13 Million tons by 2029, growing at a CAGR of 18.42% during the forecast period (2024-2029).

Which region will dominate the Solar Photovoltaic Glass market?

The Asia-Pacific region is expected to dominate the solar photovoltaic glass market. In developing countries like China, India, and Japan, the crisis in electricity supply has resulted in increasing the scope for self-producing electricity using solar photovoltaic glass.

Who are the major players in the Solar Photovoltaic Glass market?

The solar photovoltaic glass market is consolidated in nature. The major players in this market include Xinyi Solar Holdings Limited, Flat Glass Group Co., Ltd, AGC Inc., Nippon Sheet Glass Co., Ltd, and Saint-Gobain, among others (not in a particular order). Need More Details on Market Players and Competitors?

.

Why did solar glass sales decrease in the 1h2023?

In the 1H2023, PV installation demand came more from overseas and distributed generation projects, with relatively less use of double-glass and bifacial modules. As a result, the percentage of thin glass sales in the Group's solar glass sales mix decreased.

How did the solar glass business perform in 2023?

The gross profit contribution of the solar glass business increased by 20.0% to

HK\$5,033.6 million in 2023 (2022: HK\$4,193.3 million). Despite the improvement in the 2H2023, the gross profit margin of the Group's solar glass segment decreased by 2.4 percentage points to 21.4% in 2023 (2022: 23.8%).

How has the solar glass industry changed over the years?

Timely capacity expansion not only enabled the Group to capture global market growth, but also reinforced its market-leading position. By the end of 2023, the Group's daily melting capacity of solar glass reached 25,800 tonnes, an increase of 6,000 tonnes compared to the beginning of the year.
