Photovoltaic glass utilization

Overview

This chapter examines the fundamental role of glass materials in photovoltaic (PV) technologies, emphasizing their structural, optical, and spectral conversion properties that enhance solar energy conversion efficiency. What is photovoltaic waste?

Photovoltaic wastes are multi-material composites that contain diverse materials, such as, glass, metal rods and plastic; the amount of these materials on the photovoltaic waste depends on the type of solar panel [5]. However, crystalline silicon cells panels are the dominant waste in the generation of photovoltaic residues [6].

Can Photovoltaic Glass Waste be recycled?

Materials (Basel). 2023 Apr; 16 (7): 2848. Because of the increasing demand for photovoltaic energy and the generation of end-of-life photovoltaic waste forecast, the feasibility to produce glass substrates for photovoltaic application by recycling photovoltaic glass waste (PVWG) material was analyzed.

Does flat glass improve photovoltaic (PV) panel efficiency?

Flat glass transparency, low-iron glass improves photovoltaic (PV) panel efficiency. This seg- emphasis on energy efficiency and sustainability. Refs. [35, 36]. Based on in-depth analyses of market size, trends, and growth projections. Table 1. Flat glass market. augmented reality and advanced display technologies.

Why do we need to treat used PV panels?

Photovoltaic panels (solar cells) have been widely applied all over the world as renewable energy resources. Since the average lifetime of PV panel is about 20 years, considerable amount of waste PV panels are accumulating every year. Therefore, there are increasing demand for the environmentally friendly process to treat used PV panels.

Is solar PV a waste?

Global cumulative installed PV capacity reached 734 GW in 2020, and it continues to grow at an annual rate of 8.9% . Solar PV will be the dominant renewable energy source in the future. However, the rapid development of the PV industry has inevitably generated an immense amount of PV waste.

Can PV glass waste and SKW be recycled simultaneously?

In general, PV glass waste and SKW are recycled using different methods. In the current work, an original method was presented for simultaneously recycling both types of PV waste. The effects of SiO₂ surface-layer removal and silicon separation from SKW were studied.
