

SolarInvert Energy Solutions

Photovoltaic inverter industry

Overview

The global PV inverter market size was estimated at USD 13.09 billion in 2023and is expected to expand at a compound annual growth rate (CAGR) of 18.3% from 2024 to 2030. The growing awareness regarding environmental issues and need to reduce carbon emissions is driving.

Based on product, the string PV inverter segment emerged as the leading segment with the maximum revenue share of 47.10% in 2023. These inverters are highly reliable with timely.

Concerns regarding excessive carbon emissions owing to usage of conventional fuels for transportation and power generation purposes.

Based on end-use, the market is categorized into commercial, residential & industrial, and utilities segments. The utilities segment emerged as leading segment and.

The Asia Pacific region dominated the market with the largest market share of 44.09% in 2023. China is the largest contributor to the rapid growth of this region's solar market and is also a major global competitor. A growing number of solar installations in.

What is the global PV inverter market size?

The global pv inverter market size was estimated at USD 13,088.5 million in 2023 and is projected to reach USD 41,869.7 million by 2030, growing at a CAGR of 18.1% from 2024 to 2030.

What drives the PV inverter market?

The PV inverter market is poised to grow significantly over the next five years, driven by declining prices of solar panels and supportive government policies and regulations around the world. Major drivers for the market include countries mandating renewable energy generation targets and incentives for rooftop solar installations.

What are the trends in the PV inverter market?

PV Inverter Market Trends Rising demand for storage along with PV systems: The growing demand for battery storage solutions in conjunction with photovoltaic or solar systems is having a substantive impact on the PV Inverter Market.

How is the photovoltaic inverters market categorized?

To gain extensive insights into the market, Request for Customization The photovoltaic inverters market is categorized by low voltage (less than 1000 V), medium voltage (1000 V to 1500 V), and high voltage (more than 1500 V).

What is a photovoltaic (PV) inverter?

A photovoltaic (PV) inverter is also known as a solar inverter. It is an electrical device that is used to change a DC (direct current) voltage from photovoltaic arrays into AC (alternating current) currents which result in providing power to home appliances and some utility grids.

What was the market size of PV inverter in 2024?

The market size for PV inverter was valued at USD 34.6 billion in 2024 and is projected to reach USD 90 billion by 2034, growing at a CAGR of 9.5% during the forecast period. What was the market share of the three-phase segment in 2024?
