

SolarInvert Energy Solutions

Photovoltaic inverter orders

Overview

What is the global PV inverter market share?

Global PV inverter shipments grew by 56% to 536 gigawatts alternating current (GWac) in 2023, reflecting a strong year for the broader solar industry. The top 10 global PV inverter vendors accounted for 81% of the market, according to Wood Mackenzie's 'Global solar inverter and module-level power electronics market share 2024' report.

What is the global solar PV inverter market like in 2023?

Global solar PV inverter* shipments grew by 56% in 2023 to 536 GWac, with China accounting for half of all shipments as the country's solar demand doubled in 2023, according to the latest analysis by Wood Mackenzie. The top 10 PV inverter vendors, led by Chinese giants Huawei and Sungrow, controlled 81% of the global market.

How did global PV inverter shipments grow in 2023?

Global PV inverter shipments grew by 56% to 536 gigawatts alternating current (GWac) in 2023, reflecting a strong year for the broader solar industry. The top 10 global PV inverter vendors accounted for 81% of the market.

Who makes solar inverters?

The US market was led by Sungrow and Power Electronics, while Europe was led by shipments from Huawei, Sungrow and SMA. *A solar inverter is an electrical converter which changes the direct current (DC) electricity captured by solar panels, into alternating current (AC) that can be fed into the grid.

What is an off-grid solar inverter?

Off-grid is suitable for remote areas with unstable power supply or inability to connect to the grid which means places without grid connections can use solar inverters in conjunction with energy storage systems to ensure stable power supply around the clock.

Where are inverter shipment leaders from 2023?

Overall, nine of the top 10 inverter shipment leaders from 2023 were headquartered in China, where manufacturers capitalized on national investments in solar to meet both domestic and global demand.
