

### **SolarInvert Energy Solutions**

### Photovoltaic panels installed in Tirana

#### **Overview**

Is Tirana a good place to install solar panels?

Tirana, Albania, situated at a latitude and longitude of 41.3253 and 19.8184 respectively, is a favorable location for solar photovoltaic (PV) installations due to its varying seasonal average daily solar irradiance per kilowatt of installed capacity. In the summer season, it's as high as 7.85 kWh/day while in autumn it averages at 3.70 kWh/day.

Who is the best solar panel company in Albania?

Empower tomorrow with DET, the most trustworthy solar panel company in Albania! Planning & Installation of Solar Energy Systems in Albania and the Southwest Balkans Discover how to cut your energy bills with top-quality solar solutions. Our expert tips and premium products make saving money easy and efficient.

How to optimize solar generation in Tirana?

Assuming you can modify the tilt angle of your solar PV panels throughout the year, you can optimize your solar generation in Tirana, Albania as follows: In Summer, set the angle of your panels to 25° facing South. In Autumn, tilt panels to 45° facing South for maximum generation.

How much solar energy does Tirana produce a day?

Average 5.74kWh/day in Spring. To maximize your solar PV system's energy output in Tirana, Albania (Lat/Long 41.3253, 19.8184) throughout the year, you should tilt your panels at an angle of 35° South for fixed panel installations.

When will GSOL install a solar photovoltaic system?

The GSOL Energy, an international company, has been contracted to begin procuring and installing ten pilot grid-connected solar photovoltaic systems. We expect the installation process to conclude by the end of November 2023.

Additionally, ongoing consultations are held with the National Energy Efficiency Agency.

How to accelerate the solar photovoltaic market?

To further accelerate the solar photovoltaic market, the draft of the financing mechanism was provided by the end of February 2023. The work is continuing for the provision of governmental decrees following the new Law on Renewable Energy Resources (24/2023 adopted): detailed specification and content of two regulations drafted.
