Recommended UPS for Serbia substation

Overview

Why should you install a UPS system in a substation?

With UPS installations in plants and substations, you can guard against downtime throughout your entire infrastructure. Avoid the irony of a power plant without power with uninterruptible power supplies to ensure the continuity of the utility's supply and minimize disruptions.

How to choose an UPS system?

As UPS systems serve as a backup power supply, it is important to make the right choice. There are many aspects to consider when choosing a UPS and you should define the systems for which the UPS will be used in your company. The output power of the selected UPS should be 20 - 25 % higher than the total power consumption of the connected systems.

How do I determine the requirements for a ups?

To determine the requirements for a UPS generally involves a balance of cost vs. need. This Power Note describes the aspects of selecting a UPS for small, stand-alone, single-phase computer applications. The components of a basic UPS system contain a battery charger/rectifier, batteries, and an inverter.

What is an uninterruptible power supply (UPS)?

In order to eliminate or reduce the loss of important data or control, it may be necessary to provide a level of power protection for your particular needs. An Uninterruptible Power Supply (UPS) can be that answer. These devices are designed to provide continuous power to a load, even with an interruption or loss of utility supply power.

How do I choose the right ups?

Make the right UPS choice and find your UPS from 600VA to 120kVA The UPS Selector is the ideal interface to choose the UPS best suited to your specific applications by entering just a few parameters. The Socomec Team will then

respond with a quote within 24 hours. Uninterruptible Power Supply (UPS Devices).

What is a socomec ups?

Designed with your current and future needs in mind, Socomec's pioneering technologies guarantee the best possible reliability and highest levels of UPS availability for your electrical power supply. Make the right UPS choice and find your UPS from 600VA to 120kVA
