# Romania Power Station Energy Storage Site Energy Project

#### **Overview**

What is R power doing in Romania?

In addition to its activities in Romania, R.Power is involved in several renewable energy and storage initiatives across Europe. In related news, IPP Renalfa has acquired a 258 MW solar project in Teleorman, Romania, which is expected to begin operations in 2027.

What is the Romanian Energy Center?

The Romanian Energy Center (CRE) is a non-profit, non-governmental organization with the main objective to promote the active participation of Romanian state-owned and private companies in the Energy Market towards European partnerships, in European co-financed projects, and, most importantly, in the European decision-making process.

How many MW is a Bess project in Romania?

This project will feature a 127 MW power rating and an energy storage capacity of 254 MWh, making it one of the largest BESS projects in Romania to date. However, R.Power has not disclosed when the project will become operational.

Could Romania become a regional energy powerhouse?

Andreea Campeanu for The New York Times Some see Romania, a nation of 21 million roughly the size of Oregon, as having the potential to become a regional energy powerhouse that could help wean neighbors in eastern and southern Europe from dependence on Moscow.

What are Romania's energy plans?

Its ambitious energy plans include completing two of the Cernavoda plants and leading the way into a new type of nuclear technology called small modular reactors. It also wants to take full advantage of substantial offshore gas fields in the deep waters of the Black Sea. Two reactors at Cernavoda

meet about 20 percent of Romania's energy needs.

Will Romania grow its energy production capacity by 2030?

Romania has set a target to expand its energy production capacity to 32 GW by 2030, as per the latest draft of its National Energy and Climate Plan (NECP). However, the country's goal of generating 38.3% of its power from renewable sources falls short of the European Commission's recommendation of 41%.
