Saint Johns Solar System Quote

51.2V 150AH, 7.68KWH

Overview

Why should you go solar in St John's?

With energy prices expected to rise through at least 2030, going solar protects you from increasing costs by generating your own power. Your solar system will connect to the grid in St. John's via the Net-Metering program.

How does a solar system work in St John's?

Your solar system will connect to the grid in St. John's via the Net-Metering program. Excess energy you produce is credited by your power company at the retail electricity rate, balancing out your usage across day and night, as well as summer and winter months.

How many kWh does a solar installation produce in St John's?

An average solar power installation in St. John's will produce approximately 936 kWh for every 1KW of solar power installed. New solar technology has ensured that solar installations can reach their baseline production even in unfavorable sunlight conditions.

Is Newfoundland a good place to install solar power?

Despite Newfoundland and Labrador being behind some other provinces in Canada in terms of amount of sunlight received it's still a suitable place for solar with new breakthroughs in solar technology. An average solar power installation in St. John's will produce approximately 936 kWh for every 1KW of solar power installed.

Will I still have electricity if my solar system is low?

Yes, you will still have electricity. The solar system generates power during daylight hours, and your power company will provide you with credits for excess energy you produce with their net metering program. You will continue to have access to electricity when solar production is low.

Will Newfoundland & Labrador increase solar rates?

New solar technology has ensured that solar installations can reach their baseline production even in unfavorable sunlight conditions. Newfoundland and Labrador has recently approved a rate increase that started this July 2024. Rates will increase between 3.4% and 6.7% for residential customers. This is expected to continue until 2030.
