How big is the energy storage factory?

The energy storage factory covers an area of approximately 200,000 square meters, which is equivalent to the size of 30 standard soccer fields. It initially plans to produce 10,000 Megapack units a year, with a storage capacity of nearly 40 GWh.

How much energy storage will China produce by 2025?

According to Chen Haisheng, chairman of the China Energy Storage Alliance, the targeted output of new-type energy storage, such as electrochemical energy storage and hydrogen storage, will top over 3 trillion yuan by the end of 2025.

How many kilowatts of energy storage will China have?

The cumulative installed capacity of new energy storage is estimated to reach 100 million kilowatts by the end of this year. New-type energy storage has become new economic drivers in many places in China, as demonstrated by local governments' industrial planning not only for this year but also for 2027 and even 2030, said Chen.
