Small-scale solar power generation system in France

Overview

France's Energy Regulatory Commission (CRE) has announced a major policy overhaul, releasing new feed-in tariff (FIT) standards for rooftop PV systems under 500 KW for Q3 2025 (July-September), while fundamentally changing support mechanisms for small-scale solar projects. What is solar power generation in France?

This graph provides an annual and monthly overview of solar power generation in France. The evolution of solar photovoltaic generation is an important parameter in the energy transition, as it is a renewable and low-carbon energy. In 2022, solar power generation rose sharply on the back of expanded capacity and good sunlight.

How much solar power does France have?

Data from French transmission system operator RTE puts the country's installed solar PV capacity at 23.7GW, as of the end of 2024. Last year, the country added 4.7GW of solar PV, which puts it closer to the new annual target set for 2025 than the previous one set at 3GW.

How many solar panels will France have by 2030?

In the latest draft, which is open to consultation (in French) until April 05, the French government has revised its targets from 75-100GW – set in November 2024 – by 2035 to 65-90GW. By 2030, the country expects to reach 54GW of installed solar PV.

Will France reduce its solar PV target by 2035?

Image: Axpo. France has revised down its solar PV target by 2035 from 100GW to 90GW in its latest Multiannual Energy Programme (PPE3). In the latest draft, which is open to consultation (in French) until April 05, the French government has revised its targets from 75-100GW – set in November 2024 – by 2035 to 65-90GW.

How much solar power does France have in 2023?

By the end of 2023, France had installed 19.3GW of solar PV capacity, 1.3GW short of the target it had set in its previous programme. Moreover, the country also targets between 5GW to 10GW of annual solar cell and module manufacturing capacity by 2035, while reaching 3GW to 5GW of annual nameplate production for ingots and wafers.

Will France have a solar & ground-mounted PV tender?

Rooftop solar and ground-mounted PV tenders will be held annually to boost France's installations. Image: Axpo. France has revised down its solar PV target by 2035 from 100GW to 90GW in its latest Multiannual Energy Programme (PPE3).
