

SolarInvert Energy Solutions

Solar Control Systems Company

Overview

Who is solarsurges technologies?

Solarsurges Technologies is one of the China solar tracker suppliers, focusing on R&D, production, sales and service of new energy PV solar tracker controller system and AI algorithm system. More than ten years of experience in the solar panel sun tracker for sale. Contact us now!.

Why should you choose a solar tracker controller system?

Designed with excellent expandability, the solar tracker controller system meets the diverse needs of various user roles. It offers flexible and customizable features, supports multiple protocol types, and includes API interfaces for seamless data access.

What is solar tracking technology?

Solar tracking technology is a method that adjusts the angle of solar photovoltaic panels or solar thermal devices to always face the sun. The goal of this technology is to maximize solar absorption e.

How does a solar tracking system work?

It will automatically calculate the movement trajectory, the azimuth and altitude angle of sun at any moment according to the local longitude, latitude, time and program, and control the operation of motor actuators to achieve real-time solar tracking of PV modules and thus increase power generation.
