## Solar Energy Integration System in Saudi Arabia

#### **Overview**

Does Saudi Arabia have solar technology?

Solar technologies deployed in Saudi Arabia to maximize energy efficiency According to Christopher Decker, partner in energy and natural resources at Oliver Wyman, India, Middle East and Africa, Saudi Arabia is at the forefront of innovative solar technologies aimed at maximizing energy efficiency and sustainability in the region.

Is there a solar PV project in Saudi Arabia?

There is a substantial PV installation project in the Makkah province, which is expected to have a capacity of 2600 MW. This initiative is being progressively developed under the guidance of the Saudi Ministry of Energy. Fig. 3 presents a summary of the current status of solar PV projects in Saudi Arabia [36, 37]. Fig. 3.

Will Saudi Arabia be able to produce 40 gigawatts of solar energy?

The ambitious target of Saudi Arabia's National Renewable Energy Program sees the Kingdom aiming for a solar energy capacity of 40 gigawatts by 2030, promising significant opportunities for the market in the years to come.

Is Saudi Arabia a good source of solar energy?

Clean energy secured a 44 MW solar facility for a desalination project in August 2022, and a joint venture planned a 12.5 MW hybrid solar farm at King Abdullah Economic City. Solar PV is Saudi Arabia's leading RE source, benefiting from abundant solar irradiation and the highest solar electricity generation capacity in the region.

What are the current conditions of solar plant projects in Saudi Arabia?

Present conditions of solar plant projects in Saudi Arabia. The Gulf states achieved 146 GW installed power capacity by 2020, with renewables at 3.27 GW. Solar PV dominates at 71 %, followed by CSP, biomass, and wind. UAE

leads in adoption at 68 %, Saudi Arabia at 16 %, and Kuwait, as shown in Fig. 4.

How much solar power does Saudi Arabia have?

By 2020, the installed solar PV capacity in Saudi Arabia had grown to 5.6 GW, with distributed solar PV systems, including rooftops, accounting for 2.6 GW of this total capacity. This marks a substantial increase from the mere 25 MW of installed solar capacity back in 2014.

#### Solar Energy Integration System in Saudi Arabia
