Solar Panel Shipments Photovoltaic

Overview

According to InfoLink's statistics for 2024, the top ten shipped around 502 GW of modules, up 22% YoY, showing that the annual growth rate has begun to narrow, as previously predicted, with smaller growth in Q3-Q4 than in previous years. What are the solar module shipment rankings for the first half of 2024?

The solar module shipment rankings for the first half of 2024 have been announced by Taiwan-based PV InfoLink. The rankings are as follows: The top 10 PV module manufacturers shipped a total of 226 GW, with the leading four companies contributing to 63% of this volume, highlighting a growing oligopoly in the solar panel industry.

Are photovoltaic module shipments published?

U.S. photovoltaic module shipments by state or territory Individual data for most states are not published to protect the confidentiality of individual company data. Individual data for most states are not published to protect the confidentiality of individual company data.

Which solar module shipments will be fierce in 2024?

Competition for third and fourth place in the global module shipments list will be fierce in 2024. According to Trina Solar, its shipments of 50.5GW in the first three quarters ranked fourth in the world, slightly less than LONGi Green's 51.23GW, with a difference of only 0.83GW between the two.

Which solar company has the most solar shipments in the world?

According to Trina Solar, its shipments of 50.5GW in the first three quarters ranked fourth in the world, slightly less than LONGi Green's 51.23GW, with a difference of only 0.83GW between the two. Jinko Solar, JA Solar, LONGi and Trina Solar remain in the top four in terms of module shipments. Tongwei currently ranks fifth.

Do I need to report a monthly photovoltaic module shipment report?

Beginning in January 2017, we required some of the respondents for the annual survey Form EIA-63B, Photovoltaic Module Shipments Report, to report monthly data. The subset of respondents now must report monthly accounts for about 90% of photovoltaic (PV) activity in the United States, based on 2021 data.

What is the market size of PV modules in 2024?

VDMA calculates PV module shipments in 2024 at 703 GW, with average prices having dropped by 33% compared to the end of 2023. The report also reveals that crystalline silicon PV technologies continue to dominate the global market with a share of around 98%, with n-type wafers accounting for a 70% share.
