

SolarInvert Energy Solutions

Solar power generation system equipment

Overview

What is a solar power generation system?

Solar power generation system is the conversion of energy from sunlight into electricity, either directly using photovoltaic (PV), or indirectly using concentrated solar power. Concentrated solar power systems use lenses or mirrors and tracking systems to focus a large area of sunlight into a small beam.

What equipment do I need to go solar?

You need solar panels, inverters, racking equipment, and performance monitoring equipment to go solar. You also might want an energy storage system (aka solar battery), especially if you live in an area that doesn't have net metering.

How does a solar energy monitoring system work?

This nifty piece of solar energy equipment reports the hourly electricity production of your solar system. In addition to being a fun way to watch your panels power your home, monitoring systems allow you to recognize potential performance issues and ensure maximum electricity production.

How do solar panels work?

Captures energy from the sun. Transfers solar energy into usable energy. Mounts your solar panels to your roof. Allows you to track the amount of energy your solar panels generate. Stores excess electricity for use later on. Your primary equipment decision is the brand and type of panels for your system.

What is a polycrystalline solar panel?

Polycrystalline panels are a lighter blue hue, the cheaper and less efficient option. Generating rooftop solar energy is a simple process in which solar panels convert sunlight into direct current (DC) power that can be delivered to

a home's power system. However, most homes and businesses are wired to use alternating current (AC) power.

What is solar racking & how does it work?

Racking allows your solar installer to optimally angle solar panels for maximum performance and helps attach the array to your roof without causing damage. Solar panels will ideally face south at an angle of between 30 and 50 degrees. The term "racking" refers to a rooftop installation.

Solar power generation system equipment

What equipment does a solar power plant have?

Jun 17, 2024 · A comprehensive understanding of the equipment utilized in solar power systems is essential for maximizing energy efficiency and ensuring ...

Get Started

The Equipment You Need For A Solar Panel System

May 3, 2024 · To go solar, you'll need solar panels, inverters, racking equipment, and performance monitoring equipment--at a minimum. Depending on where ...
