

### **SolarInvert Energy Solutions**

# **Sophia Telecom Photovoltaic Site**

#### **Overview**

Are Sophia tiles solar powered?

Sophia TILEs are solar powered. Earth observation imagery and sensor data downlinked to Earth currently suffer long analysis times due to bandwidth constraints. Sophia TILEs process that data in orbit and relay near-real-time results to defense and emergency responders.

How many telecom sites in India use solar photovoltaic?

Technologies like solar photovoltaic, wind power, fuel cell and other renewable energy sources have been deployed in about 4,021 telecom sites in India12. Approximately 1,000 Indus Towers sites use solar photovoltaic13 to augment the grid and diesel generated power.

Which government is supporting off-grid solar photovoltaic telecom applications?

The Ministry of New and Renewable Energy (MNRE) is supporting off-grid solar photovoltaic telecom applications by providing capital subsidy of 30%21. India Renewable Energy Development Agency (IREDA) offers soft loans at 5% interest rate for renewable energy projects.

How does Sophia tile work?

Sophia TILEs process that data in orbit and relay near-real-time results to defense and emergency responders. High-performance AI workloads generate excessive heat, requiring water-intensive cooling solutions on Earth while current LEO compute growth is limited due to space radiator requirements.

What is a Sophia tile?

Sophia TILEs have proprietary thermal load balancing hardware plus software. Expanding data centers on Earth is increasingly difficult due to regulatory and environmental issues. Deployed at 600-1,000 KM in a sun-synchronous orbit, Sophia ODCs will place data centers in their natural habitat, space. Why now?

.

Can solar power be used at telecom sites?

proves power harvesting. By leveraging the solar power at telecom sites, operators can substantially reduce th to -48VDC power system 2 kup system among othersLarge space for flexible application: the user equipment and battery chamber can share the same space, which can be flexibly adjusted based
