

SolarInvert Energy Solutions

South American base station energy storage battery brand

Overview

What is the largest battery energy storage system in Latin America?

ENGIE obtained approval from the National Electricity Coordinator (CEN) to start commercial operation of BESS Coya, the largest battery energy storage system in Latin America to date. This system has a storage capacity of 638 MWh, with 139 MW of installed capacity.

What are the opportunities for battery energy storage systems in Latin America?

The opportunities for battery energy storage systems are growing rapidly in Latin America. Below are some key details for those who want to understand and succeed in the BESS market. In 2010, the IEA projected that the world would reach its 2019 solar penetration only in 2035. Analysts underestimated solar adoption by 16 years.

Is South America a key player in the lithium-ion battery industry?

As the global demand for electric vehicles (EVs) and renewable energy storage grows, South America is emerging as a key player in the lithium-ion battery industry. The region is home to some of the world's largest lithium reserves, particularly in Argentina, Bolivia, and Chile—often referred to as the "Lithium Triangle.".

What are the top 10 lithium-ion battery manufacturers in South America?

This article explores Top 10 Lithium-Ion Battery Manufacturers In South America; CATL, Companhia Brasileira de Lítio (CBL), YPF-Tec,BYD, LG Energy, Panasonic, SQM, EnerSys, Duracell, and Saft. Last Updated on February 21, 2025.

How much battery capacity will Latin America have by 2023?

While the U.S. was expected to have nearly 60 GWh of installed battery capacity by the end of 2023, AMI estimates that Latin America had less than 1

GWH of operational BESS projects—a 60x difference. This large gap will be bridged at different speeds based on each country's specific regulations.

Where are lithium batteries made?

The region is home to some of the world's largest lithium reserves, particularly in Argentina, Bolivia, and Chile—often referred to as the "Lithium Triangle." In recent years, several manufacturers in South America have been developing lithium-ion battery production capabilities to meet the increasing demand for sustainable energy solutions.
