

SolarInvert Energy Solutions

South Sudan energy storage mobile power manufacturer

Overview

Does South Sudan have a large-scale solar power project?

South Sudan has taken a significant step toward renewable energy with the launch of its first large-scale solar power project. The Ezra Group, a prominent business conglomerate, has successfully developed and financed a 20-megawatt (MW) solar power plant, complemented by a 14-megawatt-hour (MWh) Battery Energy Storage System (BESS).

Why should South Sudan invest in solar power & battery storage?

This project marks a significant achievement for South Sudan, reinforcing its commitment to renewable energy and environmental responsibility. By investing in solar power and battery storage technology, the country is making a decisive move toward energy independence, economic growth, and a sustainable future for its people.

How will a 20 MW solar plant benefit Juba?

The 20 MW solar plant is set to power approximately 16,000 households in Juba. It will also enhance grid stability and reduce energy costs for consumers. The accompanying battery storage system ensures that solar-generated power remains available when needed, stabilizing the grid and improving renewable energy reliability.

Why is SSEC a success in South Sudan?

The success of this project is largely due to the strategic collaboration with key partners, including the South Sudan Electricity Corporation (SSEC) and the Ministry of Energy and Dams, which oversee electricity generation, transmission, and distribution across the country.

Where does jedco get its energy?

JEDCO sources bulk energy from Ezra Construction & Development Group and supplies it across the region. With the commissioning of this solar plant,

renewable energy now accounts for 19% of JEDCO's total electricity distribution, complementing existing thermal power plants.
