

## SolarInvert Energy Solutions

# Spe solar power system

## Overview

---

### What is Solarpower Europe?

SolarPower Europe is the award-winning link between policymakers and the solar PV value chain. Get to know the SolarPower Europe team working to transform the European energy system. Get to know everything about solar power. Interested in joining SolarPower Europe?

.

### What is SPE & how does it work?

With SPE, Ethernet communication at the field level becomes a reality, enabling the seamless transmission of critical process values from sensors and actuators to all participants in the automation pyramid, with the appropriate authorization.

### What is space-based solar power?

Space-Based Solar Power, SBSP, is based on existing technological principles and known physics, with no new breakthroughs required. Today's telecom satellites transmitting TV signals and communication links from orbit are basically power-beaming satellites – except at a far smaller scale of size and power.

### What companies are SPE based in?

SPE identifies these companies as Ecoprogetti, HoloSolis, K2Systems, Mondragon Assembly, SMA Solar, Stäubli, Unex, and Weidmüller, based in 6 European nations, namely Italy, Spain, Estonia, France, Germany, and Switzerland.

### What is SPE based networking?

In this SPE-based architecture, all field-level devices are directly connected to Ethernet, eliminating the need for the variety of heterogeneous legacy

networks and protocols currently used in industrial environments.

What is single-pair Ethernet (SPE)?

Single-Pair Ethernet enables seamless connectivity for field devices—such as sensors, actuators, and other IIoT devices—directly to Ethernet. Using a simple twisted-pair cable, SPE supports communication over distances of up to 1 km, delivers data rates of at least 10 Mbit/s, and provides up to 50 W of power.
