

SolarInvert Energy Solutions

Stockholm High Power Inverter

Overview

What is high power electronics?

High power electronics concern large scale power conversion with converters in the range of tens of megawatts up to gigawatts. Typical applications range from large motor drives and railway power supplies to high voltage direct current (HVDC) links used for long distance power transmission.

What is Energen's new 500 kW bi-directional inverter system?

Energen's brand new 500 kW bi-directional inverter system is ready to use. The 2DI-500 will support larger storage projects. The US Patent and Trademark Office has granted Patent No. 9,209,711 B2 for the inventions driving Energen's inverter systems.

What is a microgrid inverter?

A microgrid inverter is the bridge between the DC power grid and the vessels hotel-load consumers which typically run on 230-400 V AC current. We design diesel-electric systems to meet customers' highest requirements for economic and environmental performance. We offer all types of chargers and dimension them individually for each purpose.

What is the patent number for Energen inverter systems?

The US Patent and Trademark Office has granted Patent No. 9,209,711 B2 for the inventions driving Energen's inverter systems. Energen's unique storage systems and VPP-based micro-grid technology will form part of the future's energy storage landscape around the world.

What is the study of high-voltage devices in sic?

Furthermore, the study of high-voltage devices in SiC has recently been initiated. The work is organized as two parallel activities, where one is focused on modelling and testing of devices, and the other is focused on submodule design for high-power, high-voltage converters.

What is the difference between SIC vs IGBT inverter?

Hybrid switch configuration considfred is 1:4 ratio (1 SiC + 3 IGBTs) Efficiency gain of full SiC Inverter and hybrid switch inverters vs IGBT inverter is from low load to medium load, generating advantages in power systems that operate most of the time below 40% load Hybrid switch inverter shows similar efficiency curve compared to SiC.

Stockholm High Power Inverter

Stockholm RV Inverters

Advanced RV inverters for Stockholm, Sweden. Pure sine wave output, MPPT charging, mobile app control, and multilayer safety protection. Engineered for E4, E18, E20.
