

## SolarInvert Energy Solutions

# Stockholm UPS energy storage battery

## Overview

---

What is the largest battery energy storage system in Sweden?

Named Isbillen Power Reserve, the 1-hour duration Battery Energy Storage System project will be the largest in Sweden and the largest in the Nordics by megawatt (MW) power. The largest by megawatt-hours energy capacity in the Nordics will be a 2-hour project in Finland that Neoen recently started building.

When will a battery energy storage system be built in Sweden?

Construction has begun on Sweden's largest Battery Energy Storage System (BESS) undertaken by Neoen, an Independent Power Producer and Nidec, a system integrator. The project has been projected to come online in early 2025. Neoen is headquartered in Paris.

What is Sweden's largest energy storage investment?

Sweden's largest energy storage investment, totaling 211 MW, goes live, combining 14 sites. 14 large-scale battery storage systems (BESS) have come online in Sweden to deploy 211 MW / 211 MWh into the region.

What is the largest unified battery storage portfolio in the Nordics?

Sweden's Minister for Climate and the Environment Romina Pourmokhtari has inaugurated the largest unified battery storage portfolio in the Nordics, a pioneering initiative developed by Ingrid Capacity in partnership with BW ESS.

How many large-scale energy storage systems are there in Sweden?

The initiative, led by Ingrid Capacity in collaboration with BW ESS, consists of 14 large-scale energy storage systems with a total capacity of 211 MW/211 MWh. This milestone investment represents a significant step toward Sweden's goal of achieving a carbon-neutral energy system.

What is Uppsala's battery storage project?

What's unique about this project is that it can support both Uppsala's electricity grid capacity as a service for Vattenfall Eldistribution, and help Svenska Kraftnät (the Swedish power grid authority) in its role to balance the frequency in Sweden. The battery storage will have a delivery capacity of 5 MW and about 20 MWh – e.g. 4 MW in 5 hours.
