

SolarInvert Energy Solutions

Swedish PV combiner box supplier

Overview

What is a PV combiner box?

A PV combiner box combines multiple strings of solar panels into one main output circuit. It's essential for any solar installation with multiple strings as it provides overcurrent protection, surge protection, and circuit isolation, ensuring the safety and efficiency of your solar system.

What is a DC combiner box?

Our DC combiner boxes offer users the possibility to integrate short-circuit and overvoltage protection, as well string monitoring solutions (I, V, T and SPD and switch isolator status), for PV systems using central inverters with PV panels in trackers and fix tilt systems.

What is a 1500V DC combiner box?

ETEK Solar's 1500V DC combiner box is a high-quality solution designed for utility-scale solar power plants. Equipped with a 1500V DC disconnect or molded case circuit breaker, PV fuses and Type 2 PV surge protector, it provides comprehensive overcurrent and overvoltage protection to ensure efficiency and reliability in high-power applications.

What is a solar combination box?

A Solar Combiner Box is an essential component in solar power systems that combines multiple strings of solar panels into one main output circuit. It provides critical protection functions including overcurrent protection, surge protection, and circuit isolation, ensuring the safety and efficiency of your solar installation.

How are PV DC combiner boxes tested?

PV DC combiner boxes are tested according to IEC-61439-2 and are constructed on the basis of the test results as well as assembled for the specific application. This ensures that each of the requirements of the target

application is fully met.

What is a 600v DC combiner box?

ETEK Solar's 600V DC combiner box is ideal for residential and small commercial solar installations. This compact yet robust solution combines multiple solar string inputs while providing essential protection features, most popular for homes. The EKDBS-PV1/1-IFS-600 is a high-quality 600V DC single-inp.
