Swiss new all-vanadium liquid flow battery

Overview

Construction has started on what is described as the world's largest flow battery, an 800-MW/1.6-GWh project in Laufenburg, Switzerland, non-profit association Flow Batteries Europe (FBE) said on Tuesday. What is the world's largest flow battery?

Construction has started on what is described as the world's largest flow battery, an 800-MW/1.6-GWh project in Laufenburg, Switzerland, non-profit association Flow Batteries Europe (FBE) said on Tuesday.

Where will redox flow battery energy storage be built?

From ESS News A redox flow battery energy storage facility with an output of 500 MW will be built in Switzerland. The development was announced by the company Flexbase, which said the project is being built in Laufenburg, a town on the Rhine that lies partly in Switzerland and partly in Germany.

What is the world's largest redox flow battery storage system?

The 'world's largest and most modern redox flow battery storage system' will be built on a 20,000m2 footprint with a power output of 800MW and an energy storage capacity of more than 1,600MWh, the company said.

Are all-vanadium RFB batteries safe?

As an important branch of RFBs, all-vanadium RFBs (VRFBs) have become the most commercialized and technologically mature batteries among current RFBs due to their intrinsic safety, no pollution, high energy efficiency, excellent charge and discharge performance, long cycle life, and excellent capacity-power decoupling.
