Taipei Energy Storage Frequency Modulation Power Station

Overview

Which energy storage system is installed at Taipower Luyuan substation?

In 2021, Recharge Power won the bid for the "Luyuan Primary Distribution Substation (D/S) Energy Storage Equipment System 1 Set" procurement project and installed it at Taipower Luyuan Substation. This project uses the world's fourth largest Powin Energy energy storage system.

What is the first grid-level frequency control energy storage project in Taiwan?

It is the first grid-level frequency control energy storage project in Taiwan. This project uses the world's fourth largest Powin Energy energy storage system.

What is Taipower's first self-built Bess project?

This project uses the world's fourth largest Powin Energy energy storage system. The Luyuan project completed the COD as scheduled in January 2022, becoming Taipower's first self-built BESS project to go online.

When will Taipower's Luyuan project go online?

The Luyuan project completed the COD as scheduled in January 2022, becoming Taipower's first self-built BESS project to go online. This achievement not only demonstrates Recharge Power's outstanding planning and design capabilities, but also highlights its project management level fully meets Taipower's strict requirements.

Taipei Energy Storage Frequency Modulation Power Station

Frequency modulation technology for power systems

- -

Mar 9, 2025 · To help keep the grid running stable, a primary frequency modulation control model involving multiple types of power electronic power sources is constructed. A frequency ...
