

SolarInvert Energy Solutions

**The best outdoor power supply
in the world**

Overview

What is the best portable power station?

If power and battery capacity are what you are after, the Delta Pro is the ultimate large-form power station. If you are searching for a compact portable power station for on-the-go activities, the Jackery Explorer 300 is our recommendation. This unit is ideal for charging phones and laptops or running small appliances like lights and fans.

Which power station should I buy?

The Jackery 2000 Plus is the best power station for those who need ample power. While it is pricey at over \$2,000 list price, it has plenty of power, charges impressively fast, and won't let you down in case of an emergency. If your main need is charging devices like phones and laptops, our favorite is the Anker 521.

Do all power stations provide a power source?

While all power stations are intended to provide a power source, each model differs in their overall design and included features. Some models have an intuitive mobile app to fully control your power station wirelessly. Others may offer expandable battery capacity, and some are advertised as being used as an uninterrupted power supply.

Which power station has the best mobility?

The Jackery 300 and Anker 521 ran away with the best mobility scores, thanks to their small form and small battery size. However, for larger power stations, it was hard to ignore the impressive weight-to-power output ratio of the Anker Solix C1000.

Which ecoflow power station should you buy?

The EcoFlow Delta Pro is one of the most extensive units on the market. Between its dialed display, massive expansion capabilities, and a plethora of

add-ons, this power station checks off all the boxes.

How important is a good display when buying a power station?

While maybe not the first consideration when shopping for a power station, a good display becomes an important factor when the power goes out. The EcoFlow Delta Pro landed at the top of our usability metric.
