

## SolarInvert Energy Solutions

# The difference between cheap and good outdoor power supplies

## Overview

---

What is outdoor large-capacity portable power supply?

Due to its small size, large capacity, and mobility, the outdoor large-capacity portable power supply is equivalent to a large-scale portable charging treasure for people who work outdoors. It can be used in emergency rescue, emergency power supply, backup power supply, and other use scenarios.

Why should you buy outdoor power equipment?

Quality outdoor power equipment will make your lawn work easier. With our huge buying power, Power Equipment Warehouse can offer you the best pricing, fast, friendly service, and same day shipping on most items. We have negotiated truck freight discounts up to 70%, and ship smaller items via USPS, and UPS.

What is a large capacity portable power supply?

The outdoor large-capacity portable power supply has a power output of 220V/500W/1000W/1500W/2000W/3000W, but a large power means larger capacity support, and a large capacity means excellent quality. Take the capacity battery 6000wh as an example, the basic weight is close to 45KG, which is no longer “portable”.
