# **The first 5G communication base station in Sarajevo**

## Overview

---

Is BH Telecom launching a 5G network?

A few months after the 4G kick-off, in August 2019, Sarajevo-based BH Telecom—along with its partners Huawei, Ericsson, and Samsung—presented the 5G networks capabilities, including opportunities and applications of new technologies.

What is a 5G base station?

In Summary, The 5g Base Station is a Critical Element of the 5g Wireless Network, Serving As the Between User Devices and the Core Network. IT Incorporate Advanced Technologies Like Massive Mimo, BeamForming, and Adaptive Modulation to Provide High-Performance, Low-Latency, and Reliable Communication Services Across various uses.

What are the limits of electromagnetic fields for 5G in Bosnia & Herzegovina?

Bosnia and Herzegovina has no specific guidelines for the limit levels of electromagnetic fields for 5G yet, as only one operator started testing 5G networks, while others are focusing primarily on the continuity of 4G expansion in the country.

What is 5G & how does it work?

5G is being developed as the new wireless standard of ultra-fast broadband network and is an upgrade of the existing generations -4G (LTE), 3G (UMTS) and 2G (GSM).

What frequency bands do 5G base stations use?

Utilization of Frequency Spectrum: 5g Base Stations Operate in specific Frequency Bands Allocated for 5G Communication. These bands include Sub-6 GHz Frequencies for Broader Coverage and Millimeter-Wave (Mmwave) Frequencies for Higher Data Rates.

## Will Bosnia & Herzegovina be covered by 4G?

The plan was that more than 40% of Bosnia and Herzegovina's territory would be covered by 4G networks in 2020 and 75% by 2024. The licenses also pointed that allocated frequencies for 4G would allow coverage of rural areas with lower population density, and operators will be able to plan the development of their networks more efficiently.<sup>23</sup>
