

SolarInvert Energy Solutions

The first energy storage power station in Sao Paulo Brazil

Overview

Grid operator ISA CTEEP has started commercially operating a large-scale battery energy storage system (BESS) at the Registro substation in the Brazilian state of Sao Paulo. What is Brazil's first large-scale energy storage system?

Brazil launched on Thursday its first large-scale energy storage system with a total capacity of 30 MW, power sector regulator Aneel announced. Inauguration of the 30 MW energy storage system.

How much does Brazil's energy storage system cost?

(BRL 1.0 = USD 0.191/EUR 0.175) Brazil launched on Thursday its first large-scale energy storage system with a total capacity of 30 MW, power sector regulator Aneel announced.

What is Brazil's largest battery storage project?

Further details about Brazil's largest battery storage project to date have been revealed including its integrators and equipment providers. The inauguration of the 30MW/60MWh system took place last year, on the networks of transmission system operator (TSO) ISO CTEEP, as reported by Energy-Storage.news in November.

Is ISO CTEEP the first large-scale battery energy storage system?

ISO CTEEP claimed it as the first large-scale battery energy storage system (BESS) on Brazil's transmission grid. The project required a total US\$27 million investment. The transmission operator is permitted by regulations to earn up to US\$5 million revenues from the asset each year.

What is Brazil's first large-scale battery?

Brazil's transmission system operator, ISA CTEEP, has announced that the country's first large-scale battery has been connected to the grid at one of its electrical substations in Sao Paulo. The company said the battery spans

approximately 5,000 square meters and relies on 180 lithium battery modules made by an undisclosed manufacturer in China.

Is Isa CTEEP launching a large-scale battery energy storage system?

Grid operator ISA CTEEP has started commercially operating a large-scale battery energy storage system (BESS) at the Registro substation in the Brazilian state of Sao Paulo. The 30 MW/60 MWh BESS is expected to provide backup power to the grid during hours of peak demand in summer. From pv magazine LatAm
