The role of Dublin cabinet energy storage system

Overview

What is the electricity storage policy framework for Ireland?

In line with CAP Action EL/24/16, the Electricity Storage Policy Framework for Ireland (ESPF) was published by my Department in July 2024. The policy framework included 10 Government actions to support the role of electricity storage systems in Ireland's energy transition.

How much does large-scale thermal energy storage cost in Ireland?

Large-scale thermal energy storage such as that currently being deployed by district heating & cooling networks in Ireland typically have a cost that is 0.65% - 4.4% that of best-case large-scale battery storage in Ireland.

What is energy storage Ireland (ESI)?

1. Introduction Energy Storage Ireland (ESI) is a representative association of over 70 public and private sector organisations who are interested and active in the development of energy storage in Ireland and Northern Ireland.

What is Ireland's energy transition policy framework?

The policy framework included 10 Government actions to support the role of electricity storage systems in Ireland's energy transition. Actions #6 to #10 of the policy framework are designed to stimulate the development of the optimum level of electricity storage systems, including Long Duration Electricity Storage on to the grid network by 2040.

What is energy storage & why is it important?

Energy storage is the key piece of the puzzle that bridges the gap between intermittent wind & solar energy and net-zero electricity. By storing excess renewable electricity and using this to displace fossil fuels, energy storage lowers our carbon emissions and helps Ireland achieve its climate targets. 3.

What are the future plans for electricity storage?

Two memos setting out future plans for development of electricity storage, which will allow excess renewables to be stored and used when needed, and for private wires have been approved by Cabinet. The latter will allow community energy groups, private individuals or other energy users to run their own electricity cables to transfer electricity.
